Quality at Value

Suryadatta Group of Institutions: Empowering Future-Ready Professionals Across Disciplines

Ankit Shukla

In a rapidly changing world shaped by artificial intelligence, digital transformation, sustainability, entrepreneurship and global connectivity, higher education institutions are expected to do much more than impart academic knowledge. They are expected to prepare students for careers that are constantly evolving while nurturing ethical values, leadership abilities and a commitment to society. Suryadatta Group of Institutions (SGI), Pune, has consistently embraced this philosophy, creating an educational ecosystem that combines academic excellence with innovation, industry engagement and holistic development.

Established in 1989, Suryadatta has built a legacy of 28 years by focusing on quality education, student-centric learning and future-oriented academic practices. Over the years, it has emerged as one of India's leading multidisciplinary educational groups, offering programmes that cater to diverse career aspirations while remaining aligned with changing industry requirements.

A legacy built on excellence

Guided by the visionary leadership of Prof Dr Sanjay B Chordiya, Founder President and Chairman, Suryadatta has expanded into a comprehensive educational group offering undergraduate, postgraduate, diploma and doctoral programmes across disciplines including Management, Business, Commerce,

Media and Mass Communication, Computer Science, Cyber Security, Hospitality, Travel and Tourism, Fashion Design, Interior Design, Pharmacy, Physiotherapy, Arts, Law and several emerging fields. This multidisciplinary approach enables students to develop cross-functional knowledge while pursuing specialised education relevant to today's global economy.

Learning beyond the classroom

One of Suryadatta's defining strengths lies in its commitment to creating a future-ready learning environment. Academic programmes are designed around the principles of Outcome-Based Education (OBE), ensuring that

Prof Dr Sanjay B Chordiya was presented the '66 Icons of Maharashtra' award by Delhi Assembly Speaker Vijender Gupta and BJP MP Dr Sudhanshu Trivedi

learning outcomes remain closely aligned with professional expectations. The curriculum continually evolves to incorporate Industry 5.0 concepts, including artificial intelligence, digital transformation, sustainability, data-driven decision-making and human-centric innovation.

Recognising that classroom education alone is no longer sufficient, Suryadatta places significant emphasis on experiential learning. Students participate in live industry projects, corporate internships, business simulations and industry mentorship programmes that expose them to real-world challenges well before graduation. Such experiences help bridge the gap between academic theory and professional practice while building confidence, critical thinking and

decision-making skills.

Global exposure has also become an integral part of the Suryadatta experience. Through international collaborations, academic partnerships and global immersion programmes, students gain valuable insights into international business practices, cultural diversity and emerging global trends. This exposure prepares graduates to work confidently in multicultural environments and compete effectively in international markets.

Technology-driven education remains another cornerstone of the institution's academic philosophy. Students receive training in contemporary domains such as Artificial Intelligence, Data Analytics, Enterprise Resource Planning (ERP), FinTech, Cyber Security and other digital technologies that are transforming

Our vision is to create not just successful professionals but responsible global citizens equipped with knowledge, skills, values, innovation and compassion to contribute meaningfully towards nation-building and sustainable development

businesses across industries. Alongside these technical competencies, skill development certifications ensure graduates remain professionally relevant in an increasingly competitive employment landscape.

Innovation that creates entrepreneurs

Innovation and entrepreneurship occupy a central place in Suryadatta's educational ecosystem. Rather than viewing entrepreneurship as a separate disci-

pline, the institution encourages innovation across all academic streams. Students receive incubation support, startup mentoring and opportunities to convert ideas into viable business ventures. Initiatives such as Karobar 4.0 - Brand Business Story: Brought to Life provide practical exposure to branding, marketing, business strategy and entrepreneurial decision-making, enabling students to understand the complexities of modern business through experiential learning.
